ISO 639-3 Registration Authority Request for Change to ISO 639-3 Language Code

Ch Date: 2006-2-7	nange Request Number: 2006-065 (completed by Registration authority)				
Primary Person submitting request: Anthony Aristar					
•	Affiliation: Eastern Michigan University				
	star@linguistlist.org				
	and email addresses of additional supporters of this request:				
	orimary contact person for this request (in general, email correspondence will be used): University, 2000 Huron River Drive, Suite 104, Ypsilanti, MI 48197, U.S.A.				
PLEASE NOTE: Thistory of the ISO 6	his completed form will become part of the <u>public record</u> of this change request and the 539-3 code set.				
Types of chan	ge requests				
an existing code electric definition of another code or 4) create a new cobelow as appropriat	seed in requesting changes (whether creation, modification, or deletion) to elements of the the representation of names of languages — Part 3: Alpha-3 code for comprehensive ges. The types of changes that are possible are to 1) modify the reference information for ement, 2) retire a code element from use, including merging its scope of denotation into element, 3) split an existing code element into two or more new language code elements, code element for a previously unidentified language variety. Fill out section 1, 2, 3, or 4 te, plus section 5 to document the sources of your information. The process by which a reviewed and adopted is summarized on the final page of this form.				
Type of change pro	posed (check one):				
1.	Modify reference information for an existing language code element				
2.	Retire a language code element from use through a merge				
3.	Split a language code element into two or more new code elements				
4.	Create a code element for a previously unidentified language				
For changes of type	e 1, 2 or 3 (proposing a change to an existing code), please identify:				
Affected ISO 639-3	dentifier:				
Associated reference	e name:				
1 Modify an e	xisting language code element				
•					
(a) what are you	ou proposing to change: Language reference name				
	Language additional names				
	Language type (living, extinct, historical, etc.)				

Language scope (individual language or macrolanguage)

	(c)	Rationale for ch	nange:	
2. Retire a language code element from use				
	(a)	Reason for char	There is no evidence that the language exists. This is equivalent to another ISO 639-3 language. This is a variety that is fully intelligible with another ISO 639-3 language and should be merged with it.	
	(b) If one of the latter two reasons, with which ISO 639-3 code element (identifier and name) should it be merged:			
	(c) Rationale for change:			
3.	Sp	lit a languag	ge code element into two or more code elements	
	(a)	List the language	ges into which this code element should be split:	
	By the language identification criteria set forth in ISO 639-3, the simple fact of distinct identities is not enough to assign separate identifiers. The criteria are defined in the standard as follows:			
		different langua common literat	ISO 639, judgments regarding when two varieties are considered to be the same or ages are based on a number of factors, including linguistic similarity, intelligibility, a traditional or written), a common writing system, the views of users concerning between language and identity, and other factors. The following basic criteria are	

(b) What new value(s) do you propose:

- Two related varieties are normally considered varieties of the same language if users of each variety have inherent understanding of the other variety (that is, can understand based on knowledge of their own variety without needing to learn the other variety) at a functional level.
- Where intelligibility between varieties is marginal, the existence of a common literature or of a common ethnolinguistic identity with a central variety that both understand can be strong indicators that they should nevertheless be considered varieties of the same language.
- Where there is enough intelligibility between varieties to enable communication, the existence of well-established distinct ethnolinguistic identities can be a strong indicator that they should nevertheless be considered to be different languages

- (b) Referring to the criteria given above, give the rationale for splitting the existing code element into two or more languages:
- (c) Does the language code element to be split represent a major language in which there already exists a significant body of literature and research? Are there contexts in which all the proposed separate languages may still be considered the same language—as in having a common linguistic identity, a shared (or undistinguished) body of literature, a written form in common, etc.? If so, please comment.

In order to complete the change request, the form "Request for New Language Code Element in ISO 639-3" (file name "ISO639-3_NewCodeRequestForm.doc" or "ISO639-

3_NewCodeRequestForm.rtf") must also be submitted for each new identifier that is to be created. That step can be deferred until this form has been processed by the ISO 639-3 registrar.

4. Create a new language code element

- (a) Name of missing language: Ancient Zapotec
- (b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:

 This is the language of possibly the earliest Mesoamerican script, and though the script is

This is the language of possibly the earliest Mesoamerican script, and though the script is only partially deciphered, it is clear that the language is a very early precursor of the modern Zapotec languages. The language would not have been mutually intelligible with any modern Zapotec variety.

In order to complete the change request, the form "Request for New Language Code Element in ISO 639-3" (file name "ISO639-3_NewCodeRequest.doc" or "ISO639-3_NewCodeRequestForm.rtf") must also be submitted to more fully document the new language.

5. Sources of information

Please use whichever of the points below are relevant in order to document the sources on which you have based the above proposal.

- (a) First-hand knowledge. Describe:
- (b) Knowledge through personal communication. Describe:
- (c) Knowledge from published sources (please give complete bibliographical references): See accompanying new code request

The change proposal process

A request to change the code set goes through a five step process:

- 1. A user of ISO 639-3 proposes a change and submits it to the ISO 639-3 Registration Authority (ISO 639-3/RA) using this form.
- 2. The ISO 639-3 registrar processes the change request to verify that the request is compatible with the criteria set forth in the standard and to ensure that the submitter has supplied all necessary information. This may involve rounds of interaction with the submitter.
- 3. When the change request proposal is complete in its documentation (including all associated New Code Requests), the change request is promoted to "Proposed Change" status and the ISO 639-3 registrar posts the request on the official web site of the ISO 639-3/RA. Also at this time, an announcement is sent to the general LINGUIST discussion list on Linguist List (http://linguistlist.org/issues/index.html), and other appropriate discussion lists, inviting individuals to review and comment on the proposal. Any list owner may request from the ISO 639-3 registrar to receive an announcement regarding proposals involving languages in a specific region of the world or specific language family.
- 4. Individuals may send comments to the ISO 639-3 registrar for compilation. The consensus of these first reviews may result in promotion to "Candidate Status" (with or without amendment), or withdrawal of the change request, if the conclusion is that the request is not in keeping with the stated criteria of the ISO 639-3 standard.
- 5. Three months prior to the end of the annual cycle of review and update (ordinarily October 1st), a new notice is posted on the official web site of the ISO 639-3/RA, and an announcement listing the Candidate Status Change Requests is posted to the LINGUIST discussion list and other discussion lists, as requested by their owners. All change requests are then open to further review and comment by any interested party for a period of three months. A Change Request received after the start of Candidacy phase must wait until the next annual cycle for consideration. The purpose of this phase is to ensure that a minimum of three months is allotted for the review of every proposal.
- 6. At the end of the formal review period, a given Change Request may be: 1) adopted as a whole, 2) adopted in part (specific changes implicit in the whole Change Request may be adopted separately), 3) amended and resubmitted for the next review cycle, or 4) withdrawn from consideration. All change requests remain permanently archived at the official web site of the ISO 639-3/RA.
