ISO 639-3 Registration Authority

Request for Change to ISO 639-3 Language Code

Change Request Number: 2007-135 (completed by Registration authority)

Date: 2007-8-22

Primary Person submitting request: Conrad Hurd

Affiliation: SIL International

E-mail address: editor_ethnologue@sil.org

Names, affiliations and email addresses of additional supporters of this request:

Postal address for primary contact person for this request (in general, email correspondence will be used):
Ethnologue Editor, 7500 W Camp Wisdom Rd., Dallas, TX, 75236

PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set.

Types of change requests

This form is to be used in requesting changes (whether creation, modification, or deletion) to elements of the ISO 639 Codes for the representation of names of languages — Part 3: Alpha-3 code for comprehensive coverage of languages. The types of changes that are possible are to 1) modify the reference information for an existing code element, 2) propose a new macrolanguage or modify a macrolanguage group; 3) retire a code element from use, including merging its scope of denotation into that of another code element, 4) split an existing code element into two or more new language code elements, or 5) create a new code element for a previously unidentified language variety. Fill out section 1, 2, 3, 4, or 5 below as appropriate, and the final section documenting the sources of your information. The process by which a change is received, reviewed and adopted is summarized on the final page of this form.

Type of change proposed (check one):

1. ☒ Modify reference information for an existing language code element
2. ☐ Propose a new macrolanguage or modify a macrolanguage group
3. ☐ Retire a language code element from use
4. ☐ Split a language code element into two or more new code elements
5. ☐ Create a code element for a previously unidentified language

For proposing a change to an existing code element, please identify:

Affected ISO 639-3 identifier: [hmj]

Associated reference name: Chonganjiang Hmong

1. Modify an existing language code element

   (a) What are you proposing to change:

   ☒ Language reference name

   ☐ Language additional names
(b) What new value(s) do you propose: Ge
Gejia as an additional name

(c) Rationale for change:
There is no group of people that refers to this language group as "Chonganjiang Hmong." This distinct ethnolinguistic group refer to themselves as "Gho-mhon," not "Hmong," and they may object to being referred to as "Miao," even though they are officially considered part of the Miao nationality and "Miao" is the ethnicity shown on their identification cards. According to one source, the group has achieved "jia" status as the "Gejia" group within Guizhou province. They are best known locally as the "Ge" or "Gejia" people. They speak a Hmongic language that is related to the Chuanqiandian lects spoken in western Guizhou and Yunnan, and this adds to their distinctiveness from their surrounding Qiandong Miao speaking neighbors. The speakers of the Qiandong Miao lect in surrounding villages in Chong'an township of Huangping county could also be accurately called "Chonganjiang Miao," so this latter term is ambiguous and does not refer uniquely to the Ge. Furthermore, the term "Ge" or "Gejia" is now used widely in English writings and on the Internet in reference to this ethnolinguistic group, and interested individuals are baffled when they are unable to find the "Ge" language listed in the Ethnologue.

2. Propose a new macrolanguage or modify a macrolanguage group

(a) For an existing Macrolanguage, what change to its individual language membership do you propose:

(b) Rationale for change:

For a new Macrolanguage proposal, please also complete the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCode RequestForm.rtf”) must also be submitted to fully document the scope for the new macrolanguage.

3. Retire a language code element from use

(a) Reason for change:

☐ There is no evidence that the language exists.
☐ This is equivalent to another ISO 639-3 language.
☐ This is a variety that is fully intelligible with another ISO 639-3 language and should be merged with it.

(b) If one of the latter two reasons, with which ISO 639-3 code element (identifier and name) should it be merged:

(c) Rationale for change:
4. Split a language code element into two or more code elements

(a) List the languages into which this code element should be split:

By the language identification criteria set forth in ISO 639-3, the simple fact of distinct identities is not enough to assign separate identifiers. The criteria are defined in the standard as follows:

For this part of ISO 639, judgments regarding when two varieties are considered to be the same or different languages are based on a number of factors, including linguistic similarity, intelligibility, a common literature (traditional or written), a common writing system, the views of users concerning the relationship between language and identity, and other factors. The following basic criteria are followed:

- Two related varieties are normally considered varieties of the same language if users of each variety have inherent understanding of the other variety (that is, can understand based on knowledge of their own variety without needing to learn the other variety) at a functional level.
- Where intelligibility between varieties is marginal, the existence of a common literature or of a common ethnolinguistic identity with a central variety that both understand can be strong indicators that they should nevertheless be considered varieties of the same language.
- Where there is enough intelligibility between varieties to enable communication, the existence of well-established distinct ethnolinguistic identities can be a strong indicator that they should nevertheless be considered to be different languages.

(b) Referring to the criteria given above, give the rationale for splitting the existing code element into two or more languages:

(c) Does the language code element to be split represent a major language in which there already exists a significant body of literature and research? Are there contexts in which all the proposed separate languages may still be considered the same language—as in having a common linguistic identity, a shared (or undistinguished) body of literature, a written form in common, etc.? If so, please comment.

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequestForm.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted for each new identifier that is to be created. That step can be deferred until this form has been processed by the ISO 639-3 registrar.

5. Create a new language code element

(a) Name of missing language:

(b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:
In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted to more fully document the new language.

Sources of information

Please use whichever of the points below are relevant in order to document the sources on which you have based the above proposal.

(a) First-hand knowledge. Describe:

(b) Knowledge through personal communication. Describe:
A colleague lived for a total of 5 weeks in a Northern Qiandong village in Huangping county where the Ge live, and spent a day in a nearby Ge village. In observing and talking with Ge people a number of times (in the Northern Qiandong village (at a festival and in two different market towns, including the Chong'an market town for which this language entry was formerly named), the cultural distinction between the Northern Qiandong Miao of Chong'anjiang and the Ge people was obvious, as was some Ge people's aversion to being called "Miao." The Ge language was also inherently unintelligible with the Northern Qiandong Miao language used in Huangping. A short wordlist from two young Ge speakers was also taken.

Personal communications from some researchers who have traveled extensively in Ge areas. They checked the [hmj] entry and made thorough corrections. One researcher noted that friends are frequently confused when they are unable to find the Ge language listed as such in the Ethnologue.

(c) Knowledge from published sources (please give complete bibliographical references):
Wang Fushi, Mao Zongwu. 1995. Miao-Yaoyu Guyin Gouni. Beijing: Zhongguo Shehui Kexue Chubanshe. (It is true that this language group is referred to as "Chong'anjiang" in this and other Chinese linguistic sources, but under the Chuanqiandian Miao dialect, not the Qiandong Miao dialect.)

Xian Songkui. 1987. "Gejiayu Miaoyu Yuyin Cihui Bijiao." Guizhou Minzu Diaocha. Guizhou Sheng Minzu Yanjiusuo. pp. 528-567. (On the basis of comparison of phoneme inventories and of a large number of lexemes in the Gejia lect with those in several nearby Qiandong Miao lects, Xian concludes that Gejia and neighboring Qiandong belong to two differing dialects of the same overall Miao language (p. 567). He also notes that Gejia is not mutually intelligible with neighboring Qiandong Miao lects (p. 528).)

August 2006. Guizhou Gejia Minzu Yanjiu Wenji. (source for "Gejia" status in Guizhou)
The change proposal process

A request to change the code set goes through a six-step process:

1. A user of ISO 639-3 proposes a change and submits it to the ISO 639-3 Registration Authority (ISO 639-3/RA) using this form.

2. The ISO 639-3 registrar processes the change request to verify that the request is compatible with the criteria set forth in the standard and to ensure that the submitter has supplied all necessary information. This may involve rounds of interaction with the submitter.

3. When the change request proposal is complete in its documentation (including all associated New Code Requests), the change request is promoted to “Proposed Change” status and the ISO 639-3 registrar posts the request on the official web site of the ISO 639-3/RA. Also at this time, an announcement is sent to anyone requesting notification of new proposals matching their specified criteria (region and/or language family of interest). Periodically, a message maybe sent to the general LINGUIST discussion list on Linguist List (http://linguistlist.org/issues/index.html), and other appropriate discussion lists, inviting individuals to review and comment on pending proposals. Anyone may request from the ISO 639-3 registrar to receive notification regarding proposals involving languages in a specific region of the world or specific language family.

4. Individuals may send comments to the ISO 639-3 registrar for compilation. The consensus of early reviews may result in promotion to “Candidate Status” (with or without amendment), or withdrawal of the change request, if the conclusion is that the request is not in keeping with the stated criteria of the ISO 639-3 standard.

5. Three months prior to the end of the annual cycle of review and update (ordinarily October 1st), a new notice is posted on the official web site of the ISO 639-3/RA, and an announcement listing the Candidate Status Change Requests is posted to the LINGUIST discussion list and other discussion lists, as requested by their owners. All change requests are then open to further review and comment by any interested party for a period of three months. A Change Request received after the start of Candidacy phase must wait until the next annual cycle for consideration. The purpose of this phase is to ensure that a minimum of three months is allotted for the review of every proposal.

6. At the end of the formal review period, a given Change Request may be: 1) adopted as a whole; 2) adopted in part (specific changes implicit in the whole Change Request may be adopted separately); 3) amended and resubmitted for the next review cycle; or 4) withdrawn from consideration. All change requests remain permanently archived at the official web site of the ISO 639-3/RA.
