1. NAMES and IDENTIFICATION

- a) Preferred name of language for code element denotation:
Naga, Para
- b) Autonym (self-name) for this language:
Para
- c) Common alternate names and spellings of language, and any established abbreviations:
Bara Naga; Jejara Naga (It's reported that at least some Para Naga would now like to be known as Jejara Naga. However, this preference is not well documented. Most literature about the language uses the name Para Naga.)
- d) Reason for preferred name:
Name used in existing literature for separate Naga language. Spelling based on local pronunciation.
- e) Name and approximate population of ethnic group or community who use this language (complete individual language currently in use):
Para Naga. Population estimated at 2,000 or more.
- f) Preferred three letter identifier, if available: PZN

Your suggestion will be taken into account, but the Registration Authority will determine the identifier to be proposed. The identifier is not intended to be an abbreviation for a name of the language, but to serve as a device to identify a given language uniquely. With thousands of languages, many sets of which have similar names, it is not possible to provide identifiers that resemble a language name in every case.
