

# ISO 639-3 Registration Authority

## Request for Change to ISO 639-3 Language Code

Change Request Number: 2008-071 (completed by Registration authority)

Date: 2007-12-30

Primary Person submitting request: Dr Alexandre FRANÇOIS

Affiliation: CNRS-Paris

E-mail address: francois@vjf.cnrs.fr

Names, affiliations and email addresses of additional supporters of this request:

Postal address for primary contact person for this request (in general, email correspondence will be used):  
3 résidence Vaucouleur — F-91940 Les Ulis — France

PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set.

### Types of change requests

This form is to be used in requesting changes (whether creation, modification, or deletion) to elements of the *ISO 639 Codes for the representation of names of languages — Part 3: Alpha-3 code for comprehensive coverage of languages*. The types of changes that are possible are to 1) modify the reference information for an existing code element, 2) propose a new macrolanguage or modify a macrolanguage group; 3) retire a code element from use, including merging its scope of denotation into that of another code element, 4) split an existing code element into two or more new language code elements, or 5) create a new code element for a previously unidentified language variety. Fill out section 1, 2, 3, 4, or 5 below as appropriate, and the final section documenting the sources of your information. The process by which a change is received, reviewed and adopted is summarized on the final page of this form.

Type of change proposed (check one):

1.  Modify reference information for an existing language code element
2.  Propose a new macrolanguage or modify a macrolanguage group
3.  Retire a language code element from use
4.  Split a language code element into two or more new code elements
5.  Create a code element for a previously unidentified language

For proposing a change to an existing code element, please identify:

Affected ISO 639-3 identifier: lkn

Associated reference name: Lakona

### 1. Modify an existing language code element

(a) What are you proposing to change:

- Language reference name
- Language additional names

- Language type (living, extinct, historical, etc.)
- Language scope (individual language or macrolanguage)

(b) What new value(s) do you propose:

New reference name = Lakon

Alternate names = Lakona, Lakona Bay; West Gaua

Dialect names = Vure, Vurē (today about 60 speakers?); Qatareu (1 speaker); Togla (1 speaker).

(c) Rationale for change:

"Lakona" is not a name used locally, but (as often) a word borrowed by early missionaries from the foreign language Mota. Locally, the same word has the form Lakon [lakɔŋ]. In fact there is no stable designation used locally for the language; people simply mention "the language from here". Occasionally they will use the name of one of the old dialects that preceded the modern language, such as "Vure" [βure]; however there is no local agreement whether this dialect name should, or should not, serve as an umbrella name for the modern language. In 2003 I proposed that at least the name "Lakona" should be adapted to "Lakon", since Lakona is anyway not a local term. I would have preferred to ascertain the choice (as to whether we should use "Lakon" or "Vure", or otherwise) but this final decision was postponed till a later date. Whatever the final choice is, it is crucial that both "Vure" and "Lakon" are cited somewhere, as these two names are being used in the scientific literature on that language, much more than Lakona. "Lakon" was used by Codrington (1885), and I follow the same usage in my own publications. "Vure" has been used by Dr Hans Schmidt in his current work on that language (or at least on the Vure variety).

Finally, note that the Ethologue is wrong when listing "Gaua" and "Gog" as alternate names of that language; the latter two names are alternate (and obsolete) names of Nume [tɔs], a totally different language.

Besides, note that I am requesting a new Ethologue code for a previously unidentified language called "Oirat"; it is linguistically close to Lakon, but it should nonetheless be considered a separate language.

## 2. Propose a new macrolanguage or modify a macrolanguage group

(a) For an existing Macrolanguage, what change to its individual language membership do you propose:

(b) Rationale for change:

For a new Macrolanguage proposal, please also complete the form "Request for New Language Code Element in ISO 639-3" (file name "ISO639-3\_NewCodeRequest.doc" or "ISO639-3\_NewCodeRequestForm.rtf"), which must also be submitted to fully document the intended meaning for the new macrolanguage.

## 3. Retire a language code element from use

(a) Reason for change:

- There is no evidence that the language exists.

- This is equivalent to another ISO 639-3 language.
- This is a variety that is fully intelligible with another ISO 639-3 language and should be merged with it.

- (b) If one of the latter two reasons, with which ISO 639-3 code element (identifier and name) should it be merged :
- (c) Rationale for change:

#### 4. Split a language code element into two or more code elements

- (a) List the languages into which this code element should be split:

By the language identification criteria set forth in ISO 639-3, the simple fact of distinct identities is not enough to assign separate identifiers. The criteria are defined in the standard as follows:

For this part of ISO 639, judgments regarding when two varieties are considered to be the same or different languages are based on a number of factors, including linguistic similarity, intelligibility, a common literature (traditional or written), a common writing system, the views of users concerning the relationship between language and identity, and other factors. The following basic criteria are followed:

- Two related varieties are normally considered varieties of the same language if users of each variety have inherent understanding of the other variety (that is, can understand based on knowledge of their own variety without needing to learn the other variety) at a functional level.
  - Where intelligibility between varieties is marginal, the existence of a common literature or of a common ethnolinguistic identity with a central variety that both understand can be strong indicators that they should nevertheless be considered varieties of the same language.
  - Where there is enough intelligibility between varieties to enable communication, the existence of well-established distinct ethnolinguistic identities can be a strong indicator that they should nevertheless be considered to be different languages
- (b) Referring to the criteria given above, give the rationale for splitting the existing code element into two or more languages:
  - (c) Does the language code element to be split represent a major language in which there already exists a significant body of literature and research? Are there contexts in which all the proposed separate languages may still be considered the same language—as in having a common linguistic identity, a shared (or undistinguished) body of literature, a written form in common, etc.? If so, please comment.

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3\_NewCodeRequestForm.doc” or “ISO639-

3\_NewCodeRequestForm.rtf”) must also be submitted for each new identifier that is to be created. That step can be deferred until this form has been processed by the ISO 639-3 registrar.

## 5. Create a new language code element

- (a) Name of missing language:
- (b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3\_NewCodeRequest.doc” or “ISO639-3\_NewCodeRequestForm.rtf”) must also be submitted to more fully document the new language.

## Sources of information

Please use whichever of the points below are relevant in order to document the sources on which you have based the above proposal.

- (a) First-hand knowledge. Describe:  
I've been doing fieldwork in the whole Banks & Torres area since 1997. More specifically, I worked on Lakon in 2003.
- (b) Knowledge through personal communication. Describe:  
See also ongoing work by Dr Hans Schmidt:  
<http://www.hrelp.org/grants/projects/index.php?lang=49> .  
Ideally I would have liked to ask more specifically Dr Schmidt <1.Schmidt@gmx.de> about his opinion on this precise matter (what should the official name of Lakon be?) but unfortunately I haven't had the opportunity to do so as I was given only 24 hours to complete the present application form.
- (c) Knowledge from published sources (please give complete bibliographical references):  
The following references use the term "Lakon":
  - Codrington, Revd. 1885. *The Melanesian Languages*. Oxford: Clarendon.
  - François, Alexandre. 2005. Unraveling the history of vowels in seventeen north Vanuatu languages. *Oceanic Linguistics* 44-2 (Dec 2005): 443-504. Honolulu: University of Hawai'i Press.
  - François, Alexandre. 2007. Noun articles in Torres and Banks languages: Conservation and innovation. In Jeff Siegel, John Lynch and Diana Eades (eds), *Language Description, History and Development: Linguistic indulgence in memory of Terry Crowley*. Creole Language Library 30. New York: John Benjamins. Pp.313-326.

## The change proposal process

A request to change the code set goes through a six-step process:

1. A user of ISO 639-3 proposes a change and submits it to the ISO 639-3 Registration Authority (ISO 639-3/RA) using this form.
2. The ISO 639-3 registrar processes the change request to verify that the request is compatible with the criteria set forth in the standard and to ensure that the submitter has supplied all necessary information. This may involve rounds of interaction with the submitter.
3. When the change request proposal is complete in its documentation (including all associated New Code Requests), the change request is promoted to “Proposed Change” status and the ISO 639-3 registrar posts the request on the official web site of the ISO 639-3/RA. Also at this time, an announcement is sent to anyone requesting notification of new proposals matching their specified criteria (region and/or language family of interest). Periodically, a message may be sent to the general LINGUIST discussion list on Linguist List (<http://linguistlist.org/issues/index.html>), and other appropriate discussion lists, inviting individuals to review and comment on pending proposals. Anyone may request from the ISO 639-3 registrar to receive notification regarding proposals involving languages in a specific region of the world or specific language family.
4. Individuals may send comments to the ISO 639-3 registrar for compilation. The consensus of early reviews may result in promotion to “Candidate Status” (with or without amendment), or withdrawal of the change request, if the conclusion is that the request is not in keeping with the stated criteria of the ISO 639-3 standard.
5. Three months prior to the end of the annual cycle of review and update, a new notice is posted on the official web site of the ISO 639-3/RA, and an announcement listing the Candidate Status Change Requests is posted to the LINGUIST discussion list and other discussion lists, as requested by their owners. All change requests are then open to further review and comment by any interested party for a period of three months. A Change Request received after the start of Candidacy phase must wait until the next annual cycle for consideration. The purpose of this phase is to ensure that a minimum of three months is allotted for the review of every proposal.
6. At the end of the formal review period, a given Change Request may be: 1) adopted as a whole; 2) adopted in part (specific changes implicit in the whole Change Request may be adopted separately); 3) amended and resubmitted for the next review cycle; or 4) withdrawn from consideration. All change requests remain permanently archived at the official web site of the ISO 639-3/RA.
