ISO 639-3 Registration Authority

Request for Change to ISO 639-3 Language Code

Date: 2011-6-17
Primary Person submitting request: Anthony Aristar, head of the MultiTree Team
Affiliation: The LINGUIST List, Eastern Michigan University
E-mail address: multitree@linguistlist.org

Names, affiliations and email addresses of additional supporters of this request:
Claire Bowern (claire.bowern@yale.edu)

Postal address for primary contact person for this request (in general, email correspondence will be used):
The LINGUIST List
Eastern Michigan University
2000 Huron River Dr., Suite 104
Ypsilanti, MI 48197

PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set and will be posted on the ISO 639-3 website.

Types of change requests

This form is to be used in requesting changes (whether creation, modification, or deletion) to elements of the ISO 639 Codes for the representation of names of languages — Part 3: Alpha-3 code for comprehensive coverage of languages. The types of changes that are possible are to 1) modify the reference information for an existing code element, 2) propose a new macrolanguage or modify a macrolanguage group; 3) retire a code element from use, including merging its scope of denotation into that of another code element, 4) split an existing code element into two or more new language code elements, or 5) create a new code element for a previously unidentified language variety. Fill out section 1, 2, 3, 4, or 5 below as appropriate, and the final section documenting the sources of your information. The process by which a change is received, reviewed and adopted is summarized on the final page of this form.

Type of change proposed (check one):

1. ☐ Modify reference information for an existing language code element
2. ☐ Propose a new macrolanguage or modify a macrolanguage group
3. ☐ Retire a language code element from use (duplicate or non-existent)
4. ☐ Expand the denotation of a code element through the merging one or more language code elements into it (retiring the latter group of code elements)
5. ☐ Split a language code element into two or more new code elements
6. ☒ Create a code element for a previously unidentified language

For proposing a change to an existing code element, please identify:

Affected ISO 639-3 identifier:

Associated reference name:
1. Modify an existing language code element

(a) What are you proposing to change:
   - [ ] Language reference name; generally this is changed only if it is erroneous;
   - if usage is shifting to a new preferred form, the new form may be added (next box)
   - [ ] Language additional names
   - [ ] Language type (living, extinct, historical, etc.)
   - [ ] Language scope (individual language or macrolanguage)

(b) What new value(s) do you propose:

(c) Rationale for change:

2. Propose a new macrolanguage or modify a macrolanguage group

(a) For an existing Macrolanguage, what change to its individual language membership do you propose:

(b) Rationale for change:

For a new Macrolanguage proposal, please also complete the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCodeRequestForm.rtf”), which must also be submitted to fully document the intended meaning for the new macrolanguage.

3. Retire a language code element from use

(a) Reason for change:
   - [ ] There is no evidence that the language exists.
   - [ ] This is equivalent to another ISO 639-3 language.

(b) If equivalent with another code element, with which ISO 639-3 code element (identifier and name) is it equivalent:

(c) Rationale for change:

4. Expand the denotation of a code element through merging of one or more code elements

(a) List the languages (identifier and name) to be merged into this code element and retired from use:

(b) Rationale for change
5. Split a language code element into two or more code elements

(a) List the languages into which this code element should be split:

By the language identification criteria set forth in ISO 639-3, the simple fact of distinct identities is not enough to assign separate identifiers. The criteria are defined in the standard as follows:

For this part of ISO 639, judgments regarding when two varieties are considered to be the same or different languages are based on a number of factors, including linguistic similarity, intelligibility, a common literature (traditional or written), a common writing system, the views of users concerning the relationship between language and identity, and other factors. The following basic criteria are followed:

- Two related varieties are normally considered varieties of the same language if users of each variety have inherent understanding of the other variety (that is, can understand based on knowledge of their own variety without needing to learn the other variety) at a functional level.
- Where intelligibility between varieties is marginal, the existence of a common literature or of a common ethnolinguistic identity with a central variety that both understand can be strong indicators that they should nevertheless be considered varieties of the same language.
- Where there is enough intelligibility between varieties to enable communication, the existence of well-established distinct ethnolinguistic identities can be a strong indicator that they should nevertheless be considered to be different languages.

(b) Referring to the criteria given above, give the rationale for splitting the existing code element into two or more languages:

(c) Does the language code element to be split represent a major language in which there already exists a significant body of literature and research? Are there contexts in which all the proposed separate languages may still be considered the same language—as in having a common linguistic identity, a shared (or undistinguished) body of literature, a written form in common, etc.? If so, please comment.

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequestForm.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted for each new identifier that is to be created. That step can be deferred until this form has been processed by the ISO 639-3 registrar.

6. Create a new language code element

(a) Name of missing language: Aritinngithigh

(b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:

According to Kenneth Hale in his "Classification of Northern Paman Languages, Cape York Peninsula, Australia: A Research Report" (1964), he identifies Aritinngithigh as a language,
which he refers to as Aritinŋitŋiy. Two years later in 1966 in the appendix of Geoffrey N. O’Grady, Florence Marie Robinett Voegelin and Charles Frederick Voegelin’s "Languages of the World: Indo-Pacific Fascicle Six," Hale still asserts that Aritinŋitŋiy is a Northern Paman language. As he states in the 1964 and 1966 works:

"Aritinŋitŋiy is the term applied by the Linŋitŋiy to the language originally spoken around the head of the Hey River. The term is derived from a form of the Aritinŋitŋiy verb /ari-/ to go. It is the Aricingiti of McConnel, the Aditinngeti of Sharp (McConnel, 1939; Sharp, 1939), and the Aratiniti of Capell (1956). The informants for this language used either this Linŋitŋiy term or the Nt’waŋayt designation /aritinŋayt/.” (1964: 254 and 1966: 166)

Furthermore, in Hale’s 1976’s "Phonological Developments in Particular Northern Paman Languages," he solidifies Aritinŋitŋiy as a Northern Paman language by extensively researching the phonological development of Aritinŋitŋiy, such as stops, nasals, liquids, glides, and vowels. He also analyses the verb suffixes, noun suffixes, and pronoun suffixes of Aritinŋitŋiy.

Meanwhile, O’Grady, Voegelin, and Voegelin in "Languages of the World: Indo-Pacific Fascicle Six," also list Aritinngithigh as a Northern Paman Language (1966: 54).

According to the AUSTLANG website, Aritinngithigh has been confirmed as a language, and its AIATSIS Code is Y34. AUSTLANG also cites Tindale and Sutton as it says:

“According to Tindale (1974), Aretinget (Y34) is one of Winduwinda tribes, Winduwinda being a cover term for twelve or more small tribes each with a name terminating in ‘-ngit’. Sutton (2001: 460) says the origin of the term Winduwinda appears fundamentally geographical; centering on the Winda Winda Creek area and covering groups with lands between the Archer and Mission Rivers.”

AUSTLANG also states that Aritinngithigh (AIATSIS code Y34) is distinct from the language Aditinngithigh (AIATSIS code Y229*), and they cite Peter Sutton’s explanation, which is reproduced below.

In the book “Forty years on: Ken Hale and Australian languages,” Peter Sutton discusses Aritinngithigh in his chapter, “Talking Language.” He gives alternative spellings for Aritinngithigh and he states the following:

"Known as Arrithinngithigh (in Linngithigh) and Arrithinngayth (in Ndrwa'ngayth, both Hale 1966:166), I can confirm that it is also known as Arraythinngith (possibly in Ndrra’ngith) and as Arreythinwum (possibly in Yinwum). It probably had several other names as well--one expects there to have been a Wik version something like Wik *Arrithangathi, for example. Given that Aditinngithigh and ‘Arritinngithigh’ seem to have been identified with only one estate each and the names are so similar, it might be tempting to consider their distinct spellings a mere artifact of the recording process, but the names are indeed distinct and moreover the relevant estate are noncontiguous and owned by different people.” (2001: 459)

In Ethnologue 15, Aritinngithigh was listed as being related to Uradhi (ISO 639-3 code urf), but it is no longer listed as such in Ethnologue 16.

Dr. Claire Bowern places this language in the following coordinates in the Australian state of Queensland:
Latitude: -12.6681961224772
Longitude: 141.850183936748 (Bowern 2010)
To view on a map where this is located, please visit Dr. Bowern's website:

Following Dr. Bowern and AUSTLANG, we are using "Aritinngithigh" as the primary name.

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted to more fully document the new language.

Sources of information

Please use whichever of the points below are relevant in order to document the sources on which you have based the above proposal.

(a) First-hand knowledge. Describe:

(b) Knowledge through personal communication. Describe:
Location information gained through personal communication with Dr. Claire Bowern. See citation below.

(c) Knowledge from published sources (please give complete bibliographical references):

The change proposal process

A request to change the code set goes through a six-step process:

1. A user of ISO 639-3 proposes a change and submits it to the ISO 639-3 Registration Authority (ISO 639-3/RA) using this form.

2. The ISO 639-3 registrar processes the change request to verify that the request is compatible with the criteria set forth in the standard and to ensure that the submitter has supplied all necessary information. This may involve rounds of interaction with the submitter.

3. When the change request proposal is complete in its documentation (including all associated New Code Requests), the change request is promoted to “Proposed Change” status and the ISO 639-3 registrar posts the request on the official web site of the ISO 639-3/RA. Also at this time, an announcement is sent to anyone requesting notification of new proposals matching their specified criteria (region and/or language family of interest). Periodically, a message may be sent to the general LINGUIST discussion list on Linguist List (http://linguistlist.org/issues/index.html), and other appropriate discussion lists, inviting individuals to review and comment on pending proposals. Anyone may request from the ISO 639-3 registrar to receive notification regarding proposals involving languages in a specific region of the world or specific language family.

4. Individuals may send comments to the ISO 639-3 registrar for compilation. The consensus of early reviews may result in promotion to “Candidate Status” (with or without amendment), or withdrawal of the change request, if the conclusion is that the request is not in keeping with the stated criteria of the ISO 639-3 standard.

5. Three months prior to the end of the annual cycle of review and update, a new notice is posted on the official web site of the ISO 639-3/RA, and an announcement listing the Candidate Status Change Requests is posted to the LINGUIST discussion list and other discussion lists, as requested by their owners. All change requests are then open to further review and comment by any interested party for a period of three months. A Change Request received after the start of Candidacy phase must wait until the next annual cycle for consideration. The purpose of this phase is to ensure that a minimum of three months is allotted for the review of every proposal.

6. At the end of the formal review period, a given Change Request may be: 1) adopted as a whole; 2) adopted in part (specific changes implicit in the whole Change Request may be adopted separately); 3) rejected as a whole; or 4) amended and resubmitted for the next review cycle. All change requests remain permanently archived at the official web site of the ISO 639-3/RA.

Please return this form to:
ISO 639-3 Registrar
SIL International, Office of Language Information Systems
7500 West Camp Wisdom Road
Dallas, Texas 75236 USA
E-mail: iso639-3@sil.org

An email attachment of this completed form is preferred.
