Associated Change request number : 2011-121   (completed by Registration Authority)

PLEASE NOTE: This completed form will become part of the <u>public record</u> of this change request and the history of the ISO 639-3 code set. Use Shift-Enter to insert a new line in a form field (where allowed).

1. NAMES and IDENTIFICATION

a) Preferred name of language for code element denotation:
Wanyi

b) Autonym (self-name) for this language:
Wanyi

c) Common alternate names and spellings of language, and any established abbreviations:
Wanyi, Wanyee, Wanee, Waangyee, Wonyee, Waanyi, Wanji

d) Reason for preferred name:
This language has a very marginal phonemic contrast in vowel length and the second most common version of this name is "Waanyi" after the disyllabic vowel lengthening phenomenon (Breen 2003: 427). In this instance it is purely phonetic and carries no meaning distinction.

e) Name and approximate population of ethnic group or community who use this language (complete individual language currently in use):
10? (Tryon 2007: 116)

f) Preferred three letter identifier, if available: wny

Your suggestion will be taken into account, but the Registration Authority will determine the identifier to be proposed. The identifiers is not intended to be an abbreviation for a name of the language, but to serve as a device to identify a given language uniquely. With thousands of languages, many sets of which have similar names, it is not possible to provide identifiers that resemble a language name in every case.
