1. NAMES and IDENTIFICATION

- a) Preferred name of language for code element denotation:
Karenggapa
- b) Autonym (self-name) for this language:
- c) Common alternate names and spellings of language, and any established abbreviations:
Garanggaba, Karrengappa, Kurengappa
- d) Reason for preferred name:
Following AUSTLANG and Dr. Bown, this is the primary name most widely used in the sources we consulted.

Your suggestion will be taken into account, but the Registration Authority will determine the identifier to be proposed. The identifier is not intended to be an abbreviation for a name of the language, but to serve as a device to identify a given language uniquely. With thousands of languages, many sets of which have similar names, it is not possible to provide identifiers that resemble a language name in every case.
