Comments received for
ISO 639-3 Change Request
2016-025

Outcome: Rejected
Effective date: January 31, 2017
Registration Authority decision on Change Request no. 2016-025: to create the code element [pmv] for Pomeranian.

The request to create the code [pmv] for Pomeranian is rejected. The RA notes that the Change Request Form mentions that Pomeranian has become extinct in its home areas, but survives in an emigrant community in Brazil. There is evidence of some mixing of Portuguese in the language, but it is still substantially the same as the original language. Because it is a variety of an already-coded language, [nds] Low Saxon, the request for a code has been rejected.
