(completed by Registration Authority)

PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set. Use Shift-Enter to insert a new line in a form field (where allowed).

1. NAMES and IDENTIFICATION

- a) Preferred name of language for code element denotation:
Lingwa de Planeta
- b) Autonym (self-name) for this language:
Lingwa de Planeta
- c) Common alternate names and spellings of language, and any established abbreviations:
Lidepla
- d) Reason for preferred name:
It is the name of the language
- e) Name and approximate population of ethnic group or community who use this language (complete individual language currently in use):
Constructed language
- f) Preferred three letter identifier, if available: lpl

Your suggestion will be taken into account, but the Registration Authority will determine the identifier to be proposed. The identifier is not intended to be an abbreviation for a name of the language, but to serve as a device to identify a given language uniquely. With thousands of languages, many sets of which have similar names, it is not possible to provide identifiers that resemble a language name in every case.

2. TEMPORAL DESCRIPTION and LOCATION

- a) Is this a
 - Living language
 - Nearly extinct/secondary use only (includes languages in revival)
 - Recently extinct language
 - Historical language
 - Ancient language
 - Artificially constructed language

Macrolanguage

(Select one. See explanations of these types at <http://www.sil.org/iso639%2D3/types.asp>)

For individual languages, also complete:

- b) Countries where used:
Russia, its point of origin, and in other countries throughout the world where interested users live.
- c) Region within each country: towns, districts, states or provinces where used. Include GPS coordinates of the approximate center of the language, if possible:
The internet
- d) For an ancient or historical language, give approximate time frame; for a recently extinct language, give the approximate date of the last known user's death

3. MODALITY AND LINGUISTIC AFFILIATION

- a) This language is: Signed Spoken Attested only in writings
- b) Language family, if classified; origin, if artificially constructed:
Originated in Russia. Lingwa de Planeta is a neutral international auxiliary language based on the most widely spoken languages of the world, including English, German, French, Spanish, Portuguese, Chinese, Russian, Hindi, Arabic, and Persian.
- c) Closest language linguistically. For a Macrolanguage, list the individual languages (adopted and/or proposed) to be included in its group. For signed language, note influence from other signed or spoken languages:
Lidepla has an analytical grammar; its vocabulary comes from all of its source languages, with modifications.

4. LANGUAGE DEVELOPMENT AND USE

- a) What written literature, inscriptions or recordings exist in this language? Are there newspapers, radio or television broadcasts, etc.?:
A grammar <http://lingwadeplaneta.info/en/anglegram.shtm>, a variety of texts <http://lingwadeplaneta.info/en/texts.shtml>
- b) Is this language officially recognized by any level of government? Is it used in any levels of formal education as a language of instruction (for other subjects)? Is it taught in schools?:
No

- c) Comment on factors of ethnolinguistic identity and informal domains of use:
It's a conlang; the language is used mainly online.

SOURCES OF INFORMATION

You do not need to repeat sources previously identified in the form, “Request for Change to ISO 639-3 Language Code”

a) First-hand knowledge. Describe:

As with most conlangs the audience is small, but interested and active. A Facebook page for Lidepla exists <https://www.facebook.com/groups/lidepla/?fref=ts> with over 2000 members, as does a Yahoo discussion list with an archive going back to 2008 <http://groups.yahoo.com/neo/groups/lingwadeplaneta/>

b) Knowledge through personal communication. Describe:

I'm in communication with the creators, Anastasia Lysenko and Dmitry Ivanov. I forwarded a proposal for a code element in 2013. This was rejected in 2014 not on the merits of the proposal, but because of the revision process for ISO 639.

Knowledge from published sources. Include known dictionaries, grammars, etc. (please give complete bibliographical references):
