PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set and will be posted on the ISO 639-3 website.

Types of change requests

Type of change proposed (check one):

1. □ Modify reference information for an existing language code element
2. □ Propose a new macrolanguage or modify a macrolanguage group
3. □ Retire a language code element from use (duplicate or non-existent)
4. □ Expand the denotation of a code element through the merging one or more language code elements into it (retiring the latter group of code elements)
5. □ Split a language code element into two or more new code elements
6. ☒ Create a code element for a previously unidentified language

For proposing a change to an existing code element, please identify:

Affected ISO 639-3 identifier:

Associated reference name:

6. Create a new language code element

(a) Name of missing language: Mirning (alt spelling Mirminy)

(b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:
Per AIATSIS / AUSTLANG, code (A9) Mirning, the alt spelling Mirminy is preferred by some linguists or used for the family. There are 4 speakers cited from NILS 2004 and a 2005 estimate.

Per Bowern (2012), Mirning is one of two languages in the Mirminy branch of Pama-Nyungan, the other being the recently extinct ISO [nju] Ngatjumaya ([kba] Kalarko being reclassified). She does not include it under ISO [nju], but fills in the ISO cell with ‘XXX’.
In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted to more fully document the new language.
