1. NAMES and IDENTIFICATION

a) Preferred name of language for code element denotation:
Fyalu-Mugan

b) Autonym (self-name) for this language:
Fyalu or Mugan

c) Common alternate names and spellings of language, and any established abbreviations:
For Fyalu: Pelu, Felawa
For Mugan: Bolu, Bolawa

d) Reason for preferred name:
A group discussion was facilitated, which included prominent members of the language group and also those who can be referred to as the custodians of the language, and they came to this conclusion: the language speakers reported the names as their aboriginal and ancestral names which they use to identify themselves and their language. Thus they desire to have them changed or reflected as such in all documents

e) Name and approximate population of ethnic group or community who use this language (complete individual language currently in use):
Fyalu: 5,000  Mugan: 500

f) Preferred three letter identifier, if available:

Your suggestion will be taken into account, but the Registration Authority will determine the identifier to be proposed. The identifiers is not intended to be an abbreviation for a name of the language, but to serve as a device to identify a given language uniquely. With thousands of languages, many sets of which have similar names, it is not possible to provide identifiers that resemble a language name in every case.
2. TEMPORAL DESCRIPTION and LOCATION

☐ Nearly extinct/secondary use only (includes languages in revival)
☐ Recently extinct language
☐ Historical language

   - Mungan: Beru, Arewa, Badiko, Bakin, Kura, Natsira, and Bolu (Mungan) in Toro LGA of Bauchi State, Nigeria
