

ISO 639-3 Registration Authority

Request for Change to ISO 639-3 Language Code

Change Request Number: 2021-014 (completed by Registration authority)

Date: February 2, 2021

Primary Person submitting request: Nate Cheeseman

Affiliation: Payap University

E-mail address: Nate underscore Cheeseman at SIL dot org

Names, affiliations and email addresses of additional supporters of this request:

Postal address for primary contact person for this request (in general, email correspondence will be used):
Linguistics Institute at Payap University Chiang Mai 50000 Thailand

PLEASE NOTE: This completed form will become part of the public record of this change request and the history of the ISO 639-3 code set and will be posted on the ISO 639-3 website.

Types of change requests

This form is to be used in requesting changes (whether creation, modification, or deletion) to elements of the *ISO 639 Codes for the representation of names of languages — Part 3: Alpha-3 code for comprehensive coverage of languages*. The types of changes that are possible are to 1) modify the reference information for an existing code element, 2) propose a new macrolanguage or modify a macrolanguage group; 3) retire a code element from use, including merging its scope of denotation into that of another code element, 4) split an existing code element into two or more new language code elements, or 5) create a new code element for a previously unidentified language variety. Fill out section 1, 2, 3, 4, or 5 below as appropriate, and the final section documenting the sources of your information. The process by which a change is received, reviewed and adopted is summarized on the final page of this form.

Type of change proposed (check one):

1. ☒ Modify reference information for an existing language code element
2. ☐ Propose a new macrolanguage or modify a macrolanguage group
3. ☐ Retire a language code element from use (duplicate or non-existent)
4. ☐ Expand the denotation of a code element through the merging one or more language code elements into it (retiring the latter group of code elements)
5. ☐ Split a language code element into two or more new code elements (include here a request for a new code element for a divergent dialect of a major language)
6. ☐ Create a code element for a previously unidentified language.

For proposing a change to an existing code element, please identify:

Affected ISO 639-3 identifier: pzn

Associated reference name: Para Naga

1. Modify an existing language code element

(a) What are you proposing to change:

- ☒ Language reference name; generally this is changed only if it is erroneous;
if usage is shifting to a new preferred form, the new form may be added (next box)
- ☐ Language additional names

- ☐ Language type (living, extinct, historical, etc.)
- ☐ Language scope (individual language or macrolanguage)

(b) What new value(s) do you propose: **Naga, Jejara**

(c) Rationale for change (what evidence do you have that the earlier name was erroneous or offensive, or that the new name should also be included): The currently used Ethnologue name reflects the usage of the Jejara people themselves. Para is an exonym. The Jejara people, grounded in their own Literature and Culture committee, are making efforts to have the name Jejara come into full usage, by themselves and others.

Jejara who take interest in studying their people's history have confirmed and described the origins of the term "Jejara" in their own stories. Likewise, the term "Para" as a name given by outsiders and perpetuated only because it was easy to say and spell in outsiders' languages is documented in oral accounts and in their own booklet of origins and migration. The Literature and Culture committee, supported by the general population, have confirmed Jejara as the true name of their people and language and assert their desire to be referred to this way. Jejara, in Jejara phonology, is pronounced /dzí.dzi.ù/. The written form in Jejara's working orthography is seen as *Jaijairai*.

2. Propose a new macrolanguage or modify a macrolanguage group

(a) For an existing Macrolanguage, what change to its individual language membership do you propose:

(b) Rationale for change:

For a new Macrolanguage proposal, please also complete the form "Request for New Language Code Element in ISO 639-3" (file name "ISO639-3_NewCodeRequest.doc" or "ISO639-3_NewCodeRequestForm.rtf"), which must also be submitted to fully document the intended meaning for the new macrolanguage.

3. Retire a language code element from use

- (a) Reason for change:
- ☐ There is no evidence that the language exists.
 - ☐ This is equivalent to another ISO 639-3 language.
- (b) If equivalent with another code element, with which ISO 639-3 code element (identifier and name) is it equivalent: _____
- (c) Rationale for change:

4. Expand the denotation of a code element through merging of one or

more code elements

- (a) List the languages (identifier and name) to be merged into this code element and retired from use:
- (b) Rationale for change

5. Split a language code element into two or more code elements

- (a) List the languages into which this code element should be split, or the major language and the divergent variety (or varieties) for which a new code element is being requested:

By the language identification criteria set forth in ISO 639-3, the simple fact of distinct identities is not enough to assign separate identifiers. The criteria are defined in the standard as follows:

For this part of ISO 639, judgments regarding when two varieties are considered to be the same or different languages are based on a number of factors, including linguistic similarity, intelligibility, a common literature (traditional or written), a common writing system, the views of users concerning the relationship between language and identity, and other factors. The following basic criteria are followed:

- Two related varieties are normally considered varieties of the same language if users of each variety have inherent understanding of the other variety (that is, can understand based on knowledge of their own variety without needing to learn the other variety) at a functional level.
 - Where intelligibility between varieties is marginal, the existence of a common literature or of a common ethnolinguistic identity with a central variety that both understand can be strong indicators that they should nevertheless be considered varieties of the same language.
 - Where there is enough intelligibility between varieties to enable communication, the existence of well-established distinct ethnolinguistic identities can be a strong indicator that they should nevertheless be considered to be different languages
- (b) Referring to the criteria given above, give the rationale for splitting the existing code element into two or more languages, or for requesting a separate identifier for the divergent variety:
 - (c) Does the existing language code element represent a major language in which there already exists a significant body of literature and research? Are there contexts in which all the proposed separate languages may still be considered the same language—as in having a common linguistic identity, a shared (or undistinguished) body of literature, a written form in common, etc.? Please comment.

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequestForm.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted for each new identifier that is to be created. That step can be deferred until this form has been processed by the ISO 639-3 registrar, provided that sufficient information on the rationale is given in (b) above.

In the case of a minority language that has been considered in some contexts to be a dialect of a major language, yet is divergent enough to be unintelligible to speakers of the standard variety of the major language, it may be more beneficial for the users of the ISO 639-3 and 639-2 code sets to create a new code element for the divergent language variety without splitting the existing code element of the major language. The ISO 639-3 Registration Authority may make this determination when considering a request involving a major language and a highly distinct “dialect.” If such a course is followed, the rationale for the decision will be published in a comment by the Registration Authority on approval of the requested addition for the divergent variety.

6. Create a new language code element

- (a) Name of missing language: _____
- (b) State the case that this language is not the same as or has not been included within any language that already has an identifier in ISO 639-3:

In order to complete the change request, the form “Request for New Language Code Element in ISO 639-3” (file name “ISO639-3_NewCodeRequest.doc” or “ISO639-3_NewCodeRequestForm.rtf”) must also be submitted to more fully document the new language.

Sources of information

Please use whichever of the points below are relevant in order to document the sources on which you have based the above proposal.

- (a) First-hand knowledge. Describe:

- (b) Knowledge through personal communication. Describe: The evidence cited above is based on personal communication from the Literature and Culture committee of the Jejara Naga.

- (c) Knowledge from published sources (please give complete bibliographical references):
Ethnologue 23rd edition: <https://www.ethnologue.com/language/pzn>
