

# ISO 639-3 Change Requests Series 2007

## Summary of Outcomes

Joan Spanne (SIL International), ISO 639-3 Registrar, 15 January 2008

### Summary of requested changes

There were 258 requests considered, recommending 404 explicit changes in the code set. Ten of the requests are still pending. The 247 requests that have been decided have been fully approved, entailing 383 explicit changes in the code set. The 10 requests still pending will be reported in an addendum to this report.

The 383 explicit changes can be analyzed as follows:

- Retirements: 75
  - 7 non-existent languages;
  - 3 duplicate languages (treated separately from merges of sub-varieties);
  - 41 merged languages;
  - 24 split languages, resulting in 71 new language code elements (net gain of 47).
- Completely new languages: 59 newly created languages not previously associated with another language in the code set.
- Updates: 178
  - 151 name updates, either change to a name form or addition of a name form;
  - 20 denotation updates of languages into which other varieties were merged;
  - 3 macrolanguage group updates (one spread across two requests, as two updates);
  - 2 new macrolanguage groups (existing individual languages changed in scope to macrolanguages);
  - 1 change in language type (which will in the future be handled outside the formal review process, as this is non-normative, supplementary information).
