

ISO 639-3 Change Requests Series 2017

Summary of Outcomes, Revised September 2018

Melinda Lyons (SIL International), ISO 639-3 Registrar, 14 September 2018

Summary of requested changes

Altogether 35 requests were considered, recommending 40 explicit changes in the code set. Among those decided, 11 have been rejected, 21 have been fully approved, and one was partially approved. The two waiting for additional information have now been approved. In addition, decisions were made on three deferred requests from 2016, two based on the criteria for full languages document and one based on additional information from the requester.

The explicit changes can be analyzed as follows:

- Deprecations (Retirements):
 - 2 deprecated as non-existent;
 - 1 deprecated and merged into another language;
 - no split languages.
- Completely new languages: 13 newly created languages not previously associated with another language in the code set.
- Updates:
 - 7 name updates, either change to a name form or addition of a name form;

The two requests that were deferred in 2016 because they were requests to identify and code languages which have emerged from contact situations were decided in this decision cycle. These were based on a new criteria document that will guide decisions on coding for such languages in the future. This criteria document was presented to the Joint Working Group 7 of ISO and was given preliminary approval. We expect that it will be part of the new draft of ISO 639 which is currently in development. Interested parties can read it in full here. The new criteria are also the basis for the rejections of requests for codes for several constructed languages made in 2017.

In addition to the numbered and posted change requests for 2017, there were a number of routine maintenance updates. 11 language types were changed from living to extinct and 2 types changed from extinct to living. There were also 4 name updates for languages which were originally given country name disambiguators of (Sudan) but which are now given the disambiguator (South Sudan). A fifth disambiguator of (South Sudan) was assigned to the code for Bai (South Sudan) as it is often confused with the Bai languages of China.

The history of any change request may be viewed on its documentation page which uses the pattern:

Deprecations (retirements) from other than a split of a language code element

Change Request number	Identifier	Reference Name	Retirement Reason	Outcome
2016-029	mwy	Mosiro	Nonexistent	Adopted
2017-005	ncp	Ndaktup	Merged	Adopted
2017-013	lsg	Lyons Sign Language	Nonexistent	Adopted
2017-017	mwx	Mediak	Nonexistent	Adopted

Deprecations (retirements) and creations from code element splits

Change Request number	Identifier	Reference Name	New Language	Change Requested	Outcome
2016-023	nya	Nyanja		Split into [cew] Chichewa and [lsk] Town Nyanja	Rejected
2016-023	cew		Chichewa		Rejected
2016-023	lsk		Town Nyanja		Rejected
2017-006	nfu	Mfumte		Split into [cem] Central Mfumte and [sft] Southern Mfumte	Rejected
2017-006	cem		Central Mfumte		Rejected
2017-006	sft		Southern Mfumte		Rejected
2017-021	maa	San Jerónimo Tecóatl Mazatec		Split into [wmz] Mazateco occidental and [pbm] Mazateco de Puebla y del Noroeste	Rejected
2017-021	wmz		Mazateco occidental		Rejected
2017-021	pbm	Puebla Mazatec	Puebla Mazatec		Adopted

Entirely new code elements
