

ISO 639-3 Change Requests Series 2018 Summary of Outcomes

Melinda Lyons (SIL International), ISO 639-3 Registrar, 25 January 2019

Summary of requested changes

Altogether 90 requests were considered, recommending 98 explicit changes in the code set. Of the 90 change requests, 15 have been rejected, 73 have been fully approved, one was partially approved, and one was changed and approved.

Of the 98 explicit changes to individual codes, 16 were rejected and 82 accepted. The latter can be analyzed as follows:

- Deprecations (Retirements):
 - 1 deprecated as non-existent;
 - 2 deprecated as duplicates of another code;
 - 3 deprecated and merged into another language;
 - 2 split languages.
- new languages:
 - 9 newly created languages not previously associated with another language in the code set;
 - 1 created language restored a language that was earlier deprecated in error;
 - 3 languages created as a result of splits.
- Updates:
 - 61 name updates, either change to a name form or addition of a name form.

In addition to the numbered and posted change requests for 2018, there were a number of routine maintenance updates. 6 language types were changed from living to extinct and 15 language names with click letters were reviewed to correct incorrect characters.

The history of any change request may be viewed on its documentation page which uses the pattern:

<https://iso639-3.sil.org/request/2018-089>

Likewise, the history of any code element may be viewed on its documentation page which uses the pattern (where the final three letters are the code of interest):
